This is an attempt to map definitions from the IUCr Crystallographic Information File format (CIF) and Small Angle Scattering CIF (sasCIF) dictionaries onto a NeXus file format.

NeXus classes & groups highlighted in green were proposed at the March 2001 NeXus Workshop in PSI, whilst those shown in light blue are suggestions of this author and/or the ISIS NeXus Working Group.

I would like to acknowledge the helpful advice and comments made by, amongst others, Freddie Akeroyd, John Barnes, Ron Ghosh, Rex Hijel, Marc Malfois, Chris Moreton-Smith, Alan Munter, Toby Penning, and Dmitri Svergun.
